this book is dedicated to the people who ask why not as opposed to those who have made a career from asking simply why no particular text should ever really be considered a be all or end all with regard to any topic or field of endeavor the primary impetus behind this text was the novel idea that a text could or perhaps even should go beyond the basic philosophy or logic course delimiters of why and because maybe we could push the envelope or engage in out of the box thinking to ask why not this style of thinking has fostered a tremendous amount of growth over the years for my college students in several dozens of courses and using backward induction may be a more constructive way of solving all sorts of problems try it and see if it works for you if you are looking for a repository reference that ties together the theory current research and application aspects of mpt apt and the capm in one place this book is for you

this book is my doctoral dissertation it has been published here because many people

have the desire to read an old fashioned book and enjoy turning the pages to digest the information at a comfortable rate the original idea for this study as many of my graduate students already know came from a lecture by a previous graduate school professor of mine his parable concerned a famous baseball coach who was really hungry after a baseball game and decided because he was more hungry than usual to slice the post game pizza into eight slices instead of just four if you understand why that is funny then you have a good head start on the road to understanding the concept of true valuation in the field of economics concerning the long term price is the ultimate arbiter when we couple price with non traditional relative valuation whether it's pizza a corporate entity for purchase for billions of dollars or just the price of one share of stock we get a better understanding of what something is actually worth therefore we understand very quickly whether or not we are getting a good deal for the price paid if you are not a rocket scientist but want a step by step and thorough understanding of what things are really worth this book is for you

this book is dedicated to three groups of people investors advisors and academics investors are always concerned with what to do concerning money financial advisors are always concerned with how to do it concerning money professors and students are always concerned with why to do it concerning money this text actively engages the members of all three of those groups and it provides industrial strength solutions from economic history from three decades of mergers and acquisitions history so that people will gain an insight into the what how and the why of how money was actually made and by whom concerning corporate mergers and acquisitions if you are looking for a repository reference that ties all three of these aspects together in one place this book is for you
